Chevrolet Introduces the Corvette CX and CX.R Vision Gran Turismo Concepts at The Quail

By Keith Cornett –Aug 15, 2025

Chevrolet has another cool Corvette concept to share with Corvette enthusiasts today and it's a two-fer as they are sharing both the Corvette CX and the CX.R Vision Gran Turismo racer. These concepts, which once again Chevy says are not intended for production, were revealed at The Quail, a Motorsports Gathering in Carmel, California on Friday morning.

The Corvette CX and the CX.R Vision Gran Turismo are the latest concepts to come as a result of an international design exercise from GM's Advanced Design Studios. These concepts were designed and fabricated at the Chevrolet Performance Studio in Warren, MI.

"While the shape of a Corvette has always been expressive and forward-looking, each crease and line has its roots in the generations that came before it. It is aspirational, it is cultural, it is the reason people want to come and work at Chevrolet," said Phil Zak, executive design director for Chevrolet. "The CX and CX.R Vision Gran Turismo demonstrate our design teams stepping away from the constraints of production vehicles and unleashing their creativity. Through this exercise, we've added to Corvette and defined the design direction for Corvette moving forward."

Gran Turismo Concepts

CORVETTES WESTERN AUSTRALIA

Chevrolet Introduces the Corvette CX and CX.R Vision Gran Turismo Concepts at The Quail

The CX concept was imagined as a future Corvette for both the street or track and despite its futuristic design, it still somewhat resembles the Corvette with its forward-lunging nose, the horizontal featured line the defines the upper and lower bodywork, and dual taillight design which are all features of Corvette models both past and present. The nod to fighter jets is still there with its futurized cockpit canopy that is hinged in the front.

The propulsion system for the CX Concept is an all-wheel drive electric with four motors that are mounted on each wheel to provide more than 2000 hp, and it features four-wheel torque vectoring for maximum grip and cornering. The EV has a 90-kWh lithium-ion battery mounted in the chassis.

The CX concept also uses a Vacuum Fan System for drawing air through the bodywork and creating massive downforce. The active aero offers the ability to adjust the airflow over the rear diffuser, and the front diffuser and rear wing will move automatically based on inputs and responses from the driver.

Inside the CX is a futuristic cockpit with a digital windscreen that transforms the windshield into an immersive surround display with real-time performance data, and every major control has been integrated into the steering wheel to allow the driver to keep his focus on the road.

The CX.R Vision Gran Turismo Racer celebrates the Corvette Racing program with a dedicated CX concept built exclusively for the track. While it won't be produced in real life, this concept will be available to drive on the Gran Turismo 7 video game.

The CX.R Vision Gran Turismo Racer features the familiar Yellow/Black livery from Corvette Racing, and the body is much more aggressive with more prominent active aero features, a lower ride height, and weight has been further reduced to emphasis track performance. Inside the Vision Gran Turismo Racer are special seats with an aggressive shoulder and headrest to provide head and neck support, and the touring-inspired materials from the CX are replaced with high-performance appointments including a raw carbon fiber weave on the dashboard.

Chevrolet Introduces the Corvette CX and CX.R Vision Gran Turismo Concepts at The Quail

The propulsion system for the CX.R VGT builds on the electrified performance with a high-revving V8 motor. The engine is a mid-mounted 2.0L DOHC twin turbo making 900 hp and revving up to 15,000 rpm. The EV has three electric motors, two for each of the front wheels and a third incorporated into an 8-speed DCT gearbox. GM calls the “instant torque” from this set up as “jaw-dropping.”

Chevrolet claims these two concepts aren’t just inspirational stage displays. In partnership with Chevrolet performance engineers, the Corvette design team created detailed blueprints for the chassis, drivetrain, and aerodynamic features of both the CX and CX.R VGT concepts. Working with Polyphony Digital Inc., a subsidiary of Sony Interactive Entertainment, Chevrolet will make both the roadgoing CX and the CX.R VGT racecar concepts available for fans to drive virtually in Gran Turismo 7 later this month, giving new and familiar audiences a chance to experience firsthand the future of Corvette design.
